*Recommended daily value not established

This product contains SHELLFISH

This product contains NO yeast, wheat gluten, lactose, soy protein, milk/dairy, preservatives, flavouring or colouring.

The Neoflex formula combines three ingredients - Glucosamine, Chondroitin and MSM (methylsulphonylmethane). These are all key building blocks for many of the physical structures of the joints.

Periods of high activity place additional demands on the body. In addition, natural ageing slows down the renewal process where tissues are all constantly regenerated.

Glucosamine is an integral constituent in the structure of cartilage, tendons and ligaments which are continually being rebuilt. It occurs naturally in the connective tissue and cartilage where it contributes to the mobility, strength and integrity of joint structures.

Chondroitin is also present in cartilage and connective tissue, it plays an important role in joint care. Chondroitin is involved in the attraction of fluid that lubricates and cushions the joints.

The dosage levels in Neoflex have been used in various studies that support the role Glucosamine, Chondroitin and MSM in maintaining healthy joints.

NEW! Neoflex Powers provide the same high doses of Glucosamine, Chondroitin and MSM but from a shellfish free source. With a great orange flavour, just dissolve in water once a day.

Recommended dose: One caplet three times a day or
One sachet daily

Caution: Do not take Neoflex caplet if you are allergic to shellfish instead take Neoflex Powders.

Join the Neoflex **Automatic Delivery Program (ADP)** and save 10% on the RRP. This way you will always have a supply of Neoflex to hand and your new supply will automatically be shipped and your nominated card debited sign-up at www.neoflex.co.uk/ADP/
